

Fahimul Islam

Software Engineer

fahimulislam58@gmail.com | +8801521578288 | Dhaka, Bangladesh | [Portfolio](#) | [LinkedIn](#) | [Github](#)

Summary

I'm a full-stack software engineer with experience in React, Next.js, and Node.js. I prefer functional programming over design-heavy work and exploring Golang to enhance my backend knowledge.

Skills

Languages: JavaScript, TypeScript, Go, Python, SQL, C, C++

Frontend: HTML, CSS, Tailwind, React, Next.js, Angular

Backend: Node.js, Express.js, MongoDB, Postgres(Basic)

Tools & Platform: Git, GitHub, Firebase, Tanstack Query, Vitest, Playwright

Soft Skills: Problem-solving, Communication, Teamwork, Time Management

Projects

Weatherman CLI — (Golang)

[Source Code](#)

A simple yet powerful command-line application built with Go to fetch and display real-time weather data. It integrates with the OpenWeatherMap API to provide current weather information such as temperature, feels like, humidity, and conditions for any city. This project demonstrates proficiency in Go, HTTP requests and working with external APIs.

TutorLane — (React, Tailwind, Express, MongoDB)

[Live Preview](#) [Client](#) [Server](#)

A full-stack education platform where students enroll in courses, submit assignments, and provide feedback. Teachers manage courses, while admins handle approvals, user roles, and platform settings.

- Implemented role-based access control to ensure proper user management, allowing students, teachers, and admins to have appropriate access and permissions.
- Developed an interactive assignment system that allows students to submit work, track progress, and receive feedback, enhancing engagement and improving the learning experience.
- Built a comprehensive admin panel that enables easy management of courses, users, and analytics, ensuring smooth platform operation and efficient decision-making.

EasyBooking — (Next.js, TypeScript, Tailwind, MongoDB, Auth.js)

[Live Preview](#) [Source Code](#)

A hotel booking platform where users can search, book, and manage reservations efficiently with enhanced SEO using Next.js.

- Developed a dynamic room booking system that allows users to check available rooms, select their preferences, and manage bookings efficiently.
- Implemented a secure authentication system using Auth.js, allowing users to log in safely, manage their personal profiles, track their booking history, and access their account data without compromising privacy.
- Created a review and feedback system that allows users to submit ratings and comments on booked accommodations, while employing server-side pagination to handle large amounts of data effectively, ensuring quick loading times and optimized performance.

Education

B.Sc in Computer Science and Engineering, Gopalganj Science and Technology University

Jan 2019 – April 2024

Interests

DevOps, Mobile App Development, Open Source Contribution

Languages

Bangla (Native), English (Fluent), Hindi (Conversational)
